

# **Online Footwear Shop Management System**

A project submitted to

**UKA TARSADIA UNIVERSITY**

in partial fulfilment of the requirements  
for the degree of

**Integrated Masters of Science in Information  
Technology**

for 5<sup>th</sup> Semester  
2023-24

**Submitted By:**

**Ravi Avaiya (202106100110007)**  
**Sahil Devani (202106100110108)**  
**Parth Sangani (202106100110111)**

**Guided By:**

**Mr. Rakesh Savant**  
**Associate Professor**

**Babu Madhav Institute of Information Technology**  
**Uka Tarsadia University**  
**Bardoli – 394350**

# 1. Introduction

## 1.1 Problem Definition

In today's digital world, the preference for online shopping has surged, with a significant number of people choose to buy products through various online websites. This platform should allow them to include essential information such as product images, names, descriptions, and prices making it easy for customers to access and evaluate products without the hassle of visiting physical stores among traffic and spending valuable time.

The online footwear shop management system is an advanced E-commerce online shopping website designed to facilitate customers in making secure purchases of footwears. This platform enables customers to carry out all major transactions with ease and confidence. In today's digital era, the system efficiently manages all processes through its user-friendly online application, offering a convenient and efficient shopping experience for users.

## **1.2 Project Objective**

The main objective of the “Online Footwear Shop Management System” is to enhance flexibility in workflow and easy customer service by enabling home delivery of footwears. Instead, they can now conveniently browse and purchase products online. The system efficiently manages and tracks important information regarding products, inventory, etc.

## **1.3 Project Scope**

The online footwear shop management does not provide delivery service out of India. The system does not provide tracking of the order once they dispatched for delivery. The system does not provide EMI on Purchase the products. After purchasing the product, the system does not provide return order facility.

## 2. Overall Description

### 2.1 Product Perspective/Environment Description

#### 2.1.1 Hardware Interface/ Hardware Specification

- Processor: Intel® Core™ i5-4210U CPU @ 1.70GHz
- RAM: 4.00 GB
- System Type: 64-bit Operating System, x64-based Processor
- Pen and Touch: Touch Support with 10 Touch Points
- Monitors: Generic PnP Monitors
- Keyboard: Standard PS/2 Keyboard
- Mouse: HID-complaint mouse

#### 2.1.2 Software Interface/ Software Specification

##### 1. Front-End: NetBeans IDE 18

NetBeans IDE is an open-source integrated development environment (IDE) primarily used for java, but it also supports other programming languages such as PHP, HTML, C/C++, and more. It provides a comprehensive set of tools and features that help developers to create, debug, and maintain application efficiently.

##### 2. Back-End: SQL Server

SQL (Structured Query language) Used to perform CRUD Operation on Database.

Rozarpay Payment Gateway used to perform payment service on system.

### 3. System Specific Requirements

#### 3.1 Functional Requirement

##### ➤ Manage User Login

RN	Description	Comment
<b>FR1</b>	The admin shall be able to login with own unique 'Email id; and 'password'.	Login page
<b>FR2</b>	Customer and staff must be register before authenticate login.	Registration page
<b>FR3</b>	The admin, customer and staff shall be able to change password of their profile.	Forget password page
<b>FR4</b>	User shall be able to use all the features after the authenticate of username and password.	Home page
<b>FR5</b>	The admin, customer and staff shall be able to logout from the system anytime they want.	Logout page

##### ➤ Manage Staff

RN	Description	Comment
<b>FR1</b>	Admin / staff can login with their unique 'email id' and 'password'.	Login page
<b>FR2</b>	Admin shall be able to all features after the authenticate of username and password. Like: add, update, view and delete	Add / update page
<b>FR3</b>	The admin shall be able to logout from the system anytime they want.	Logout page

➤ **Manage Product**

<b>RN</b>	<b>Description</b>	<b>Comment</b>
<b>FR1</b>	Admin shall be able to manage all the product.	Product page
<b>FR2</b>	Customer shall be able to view all products.	View
<b>FR3</b>	The system will assign a unique id (product id) to each product.	Product page
<b>FR4</b>	Admin shall be able to manage many other modules: <ul style="list-style-type: none"> <li>• Add / edit / view /active and DE active</li> <li>• Manage type</li> <li>• Manage offer</li> </ul>	Product page

➤ **Manage Customer**

<b>RN</b>	<b>Description</b>	<b>Comment</b>
<b>FR1</b>	Customer can login with own unique 'email id' and 'password'.	Login page
<b>FR2</b>	The system will assign a unique id [customer id] and password.	Add customer page
<b>FR3</b>	Customer can perform the operations like: <ul style="list-style-type: none"> <li>• Edit profile</li> <li>• Visit website</li> <li>• Search products</li> <li>• Add to cart</li> <li>• Give order</li> </ul>	Customer page
<b>FR4</b>	Admin shall be able to view the customer details.	Customer page

➤ **Manage Order**

<b>RN</b>	<b>Description</b>	<b>Comment</b>
<b>FR1</b>	This module shall be able to manage by customer.	Order page
<b>FR2</b>	The system will assign a unique id [order id] to each order.	Order page
<b>FR3</b>	Customer must be register into system before give any order.	Order page
<b>FR4</b>	Customer shall be able to add products to cart after login.	Add to cart page
<b>FR5</b>	Customer can perform the operations like: <ul style="list-style-type: none"> <li>• Add to cart</li> <li>• Edit cart</li> <li>• View cart</li> </ul>	View cart page
<b>FR6</b>	Customer shall be able to order products after login.	Order page

➤ **Manage Payment**

<b>RN</b>	<b>Description</b>	<b>Comment</b>
<b>FR1</b>	The system will assign a unique id [payment id] to each transaction.	Payment page
<b>FR2</b>	The admin shall be able to view every payment transaction.	View payment transaction page
<b>FR3</b>	The system must take payment in Only Net Banking.	Payment page

➤ **Manage Feedback**

<b>RN</b>	<b>Description</b>	<b>Comment</b>
<b>FR1</b>	Feedback module will be managed by admin and customer.	Feedback page
<b>FR2</b>	Admin sill able to view customer order feedback.	Feedback page
<b>FR3</b>	Customer can give wise feedback.	Logout page

➤ **Generate Report**

<b>RN</b>	<b>Description</b>	<b>Comment</b>
<b>FR1</b>	Generate report module manage by admin.	Report page
<b>FR2</b>	Admin will generate report like: <ul style="list-style-type: none"> <li>• Customer report</li> <li>• Customer Order wise report</li> <li>• Stock wise report</li> </ul>	Report page

### 3.2 Non-Functional Requirement

RN	Description	Comment
<b>NFR1</b>	The extent to which a software product performs its intended functions without failure.	Reliability
<b>NFR2</b>	The system will be designed in a maintainable manner. It will be easy to add new requirements in the any individual modules	Maintainability
<b>NFR3</b>	The extents to which the software is simple in its operations.	Simplicity
<b>NFR4</b>	The application will be password protected. The users will have to enter correct username and password to access the system.	Security
<b>NFR5</b>	The application will be user-friendly and easy to operate, the functions will be easily understandable.	Usability

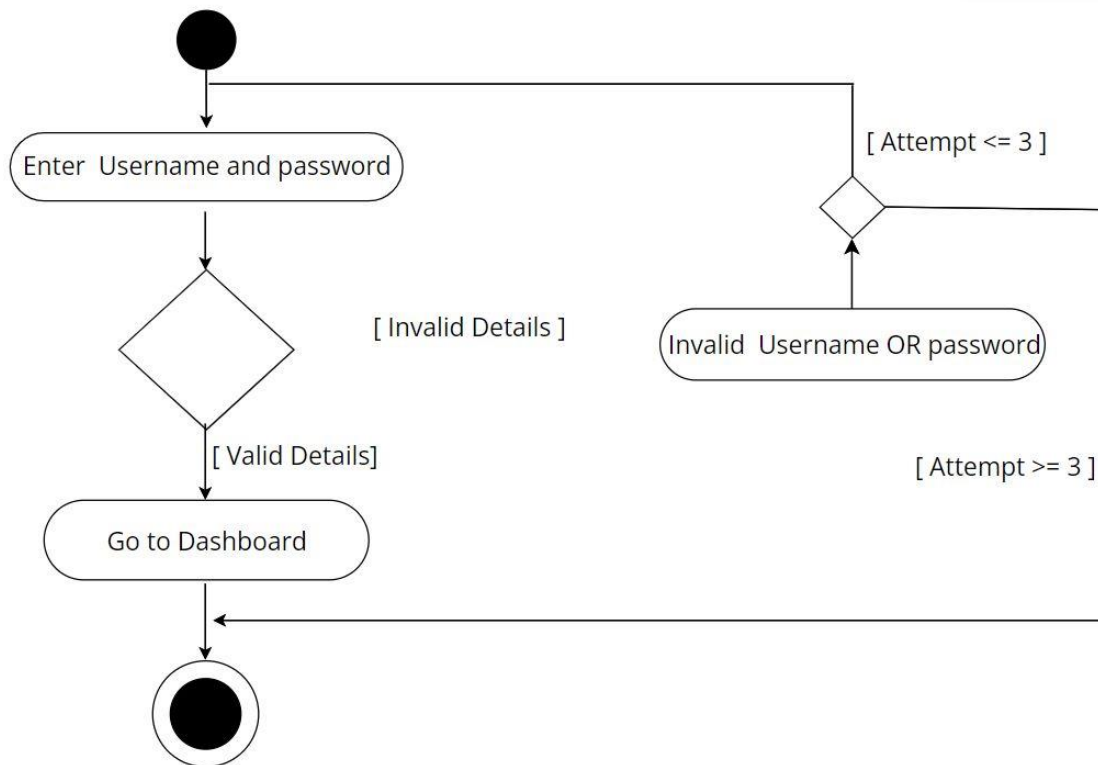

## 4. UML Diagrams

### 4.1 Use Case Diagram

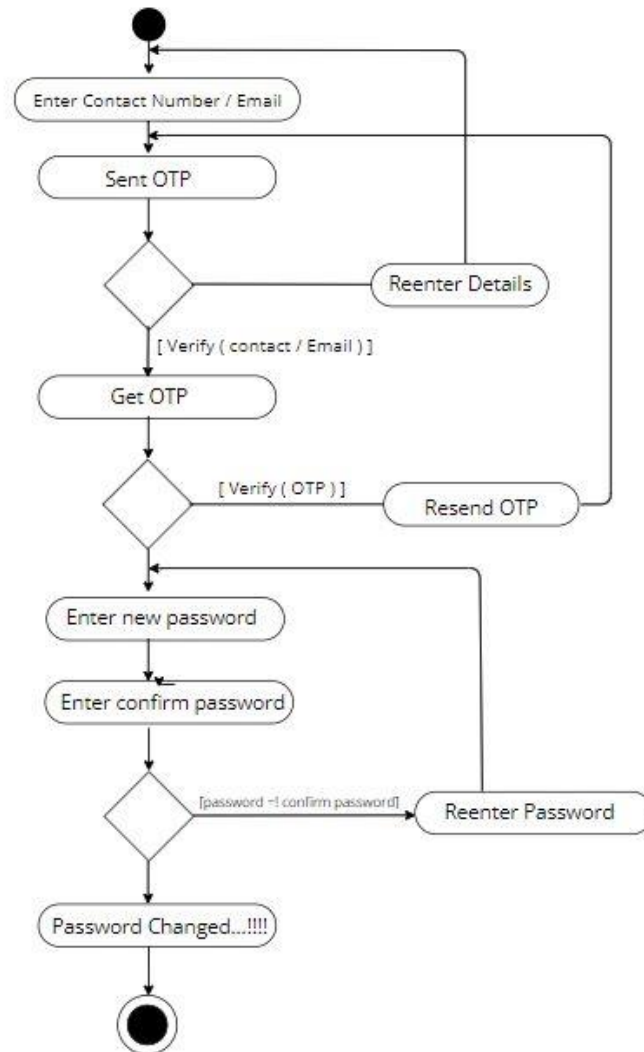

## 4.2 Activity Diagram

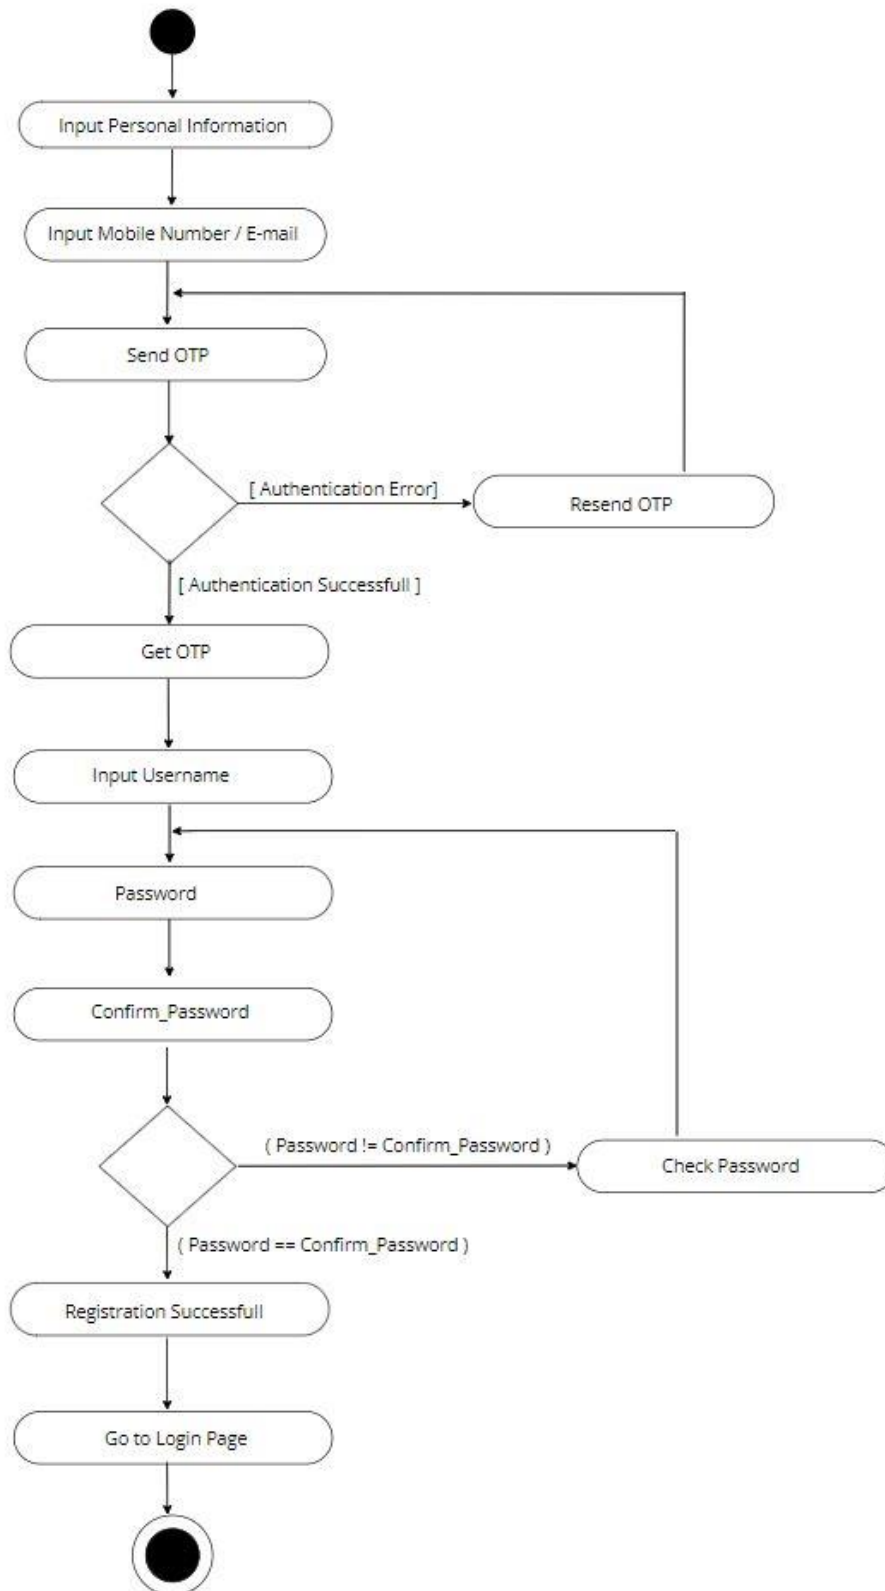

### 4.2.1 Activity Diagram for Login

#### 4.2.2 Activity Diagram for Forgot Password

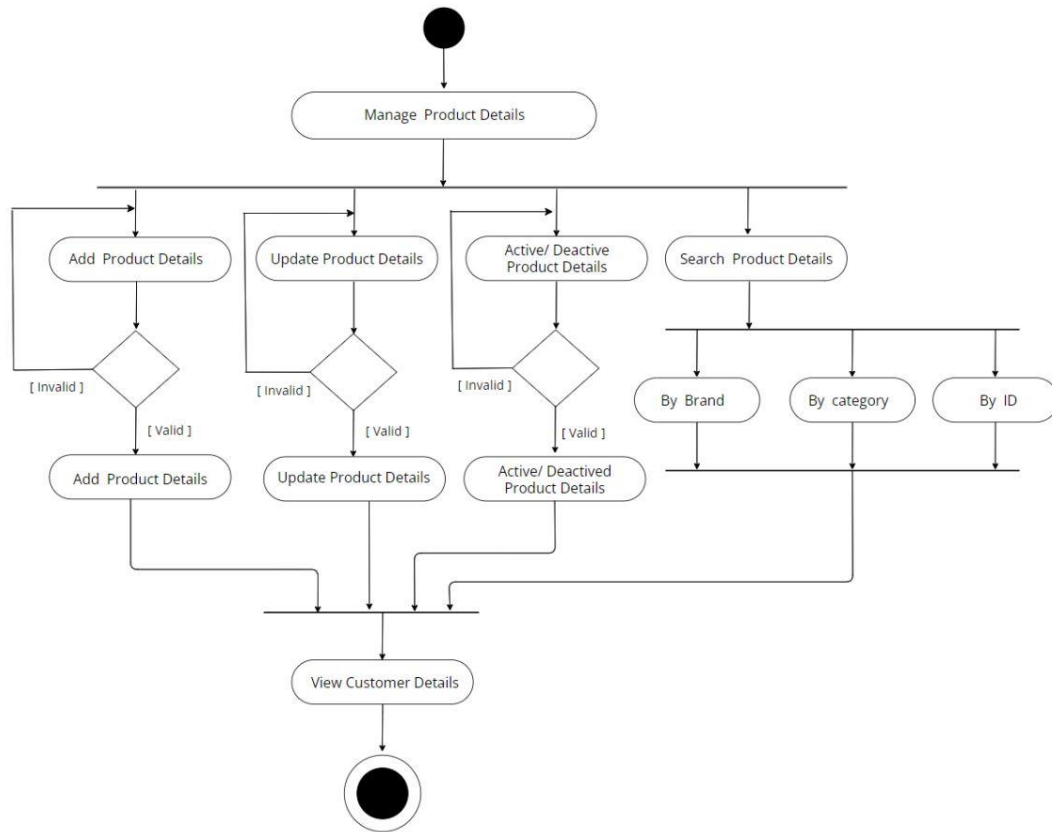

### 4.2.3 Activity Diagram for New Registration of Customer

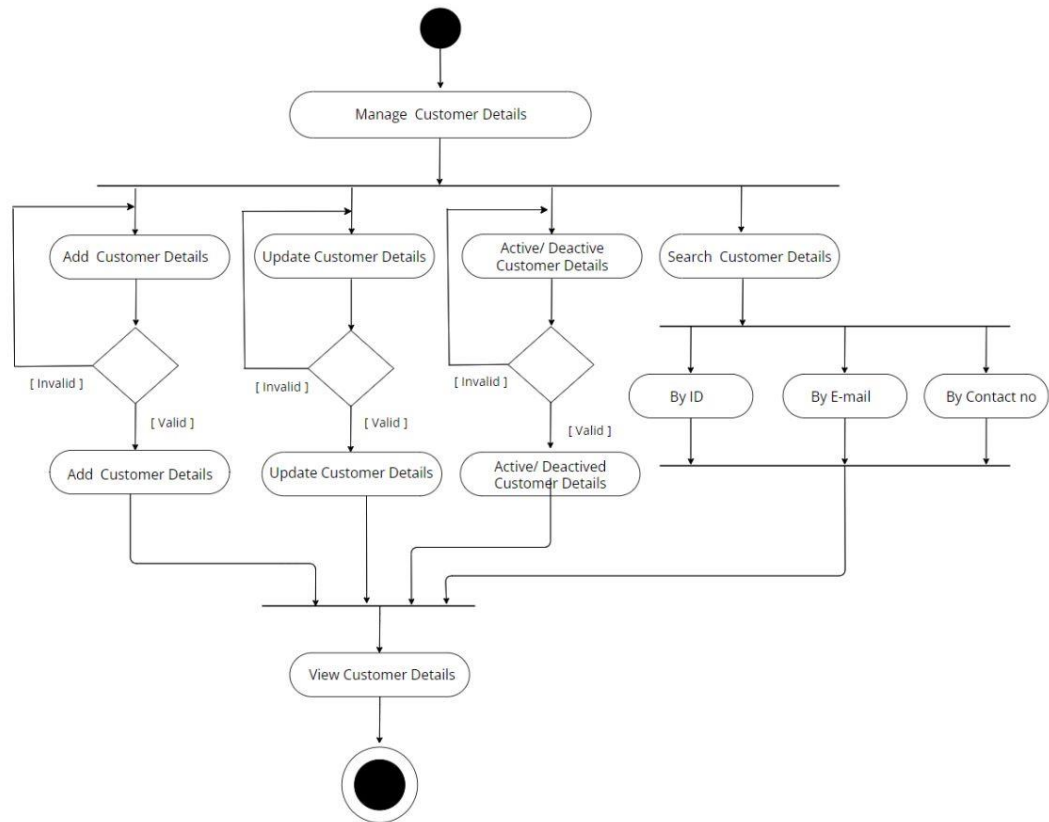

#### 4.2.4 Activity Diagram for Manage Product

### 4.2.5 Activity Diagram for Manage Customer

## 5. System Design

### 5.1 Database Design

#### 5.1.1 Database Schema

❖ Common Table

tblstate: - (id [PK], name)

FD: - id [PK] -> name

tblcity: - (id [PK], name, Sid[FK])

FD :- id[PK] -> name, sid

Tbl\_brand :- (id[PK], name)

FD :- id[PK] -> name

Tbl\_size :- (id[PK], size\_number)

FD :- id[PK] -> size\_number

Tbl\_color :- (id[PK], color\_name)

FD :- id[PK] -> color\_name

Tbl\_category :- (id[PK], c\_name)

FD :- id[PK] -> c\_name

Tbl\_subcategory :- (id[PK], sc\_name, category\_id[FK])

FD :- id[PK] -> sc\_name, category\_id

Tbl\_stock :- (id[PK], product\_id[FK], quantity)

FD :- id[PK] -> product\_id, quantity

❖ Master Tables :-

Tbl\_user :-

(id[PK],fullname,email,password,contact\_no,gender,cityid[FK],role,registered\_date)

FD :- id[PK] ->

fullname,email,password,contact\_no,gender,cityid,role,registered\_date

Tbl\_product :-

(id[PK],product\_name,model\_no,category\_id[FK],subcategory\_id[FK],brand\_id[FK],size\_id[FK],color\_id[FK],img1,added\_date)

FD :- id[PK]

sproduct\_name,model\_no,category\_id,subcategory\_id,brand\_id,size\_id,color\_id,price,product\_img1,added\_date

tbl\_cart :- (id[PK],product\_id[FK],user\_id[FK],color\_id[FK],size\_id[FK],quantity)

FD :- id[PK] -> product\_id,user\_id,quantity,color\_id,size\_id

Tbl\_order :- (id[PK],fname,lname,user\_id[FK],pay

\_id[FK],amount,address,order\_status,order\_date)

FD :- id[PK] ->

fname,lname,user\_id,pay\_id,amount,address,order\_status,order\_date

tbl\_Feedback: (ID[PK], User\_ID[FK], Description)

FD: ID ->User\_ID[FK], Description

### 5.1.2 Data Dictionary

#### 1.tbluser :-

Sr.no	Attribute Name	Data Type	Size	Constraint	Description
1.	ID	Int	10	Primary Key	It holds unique product ID.
2.	Fullname	Varchar	50	Not null	It holds fullName of customer
3.	password	Varchar	256	Not null	It holds password of customer
4.	email	Varchar	50	Unique key	It holds Email of customer
5.	Contact	bigint	20	Not null	It holds Customer contact.
6.	cityid	int	10	Foreign key	It referred from tblcity
7.	Gender	Varchar	30	Not Null	It holds Customer gender
8.	role	varchar	30	Not null,unique	It holds role for user.
9.	Registered_date	date	-	Null	It holds Customer Registered date

#### 2.tblproduct :-

Sr.no	Attribute Name	Data Type	Size	Constraint	Description
1.	ID	Int	10	Primary Key	It holds unique Product ID.

2.	Product_Name	Varchar	50	Not null	It holds the name of product.
3.	Quantity	Int	20	Not null	It holds the Quantity of the product.
4.	Category_ID	Int	50	Foreign key	It holds the unique Category_ID from category table.
5.	Price	Float	10,2	Not null	It holds the price of product.
6.	Model_no	Varchar	90	Not null	It holds the model of the product.
7.	Brand_ID	Int	50	Foreign key	It holds the unique Brand_ID from brand table.
8.	Stock	Int	50	Not null	It holds the stock of the product.
9.	Image1	int	100	Not null	It holds the path of the image_id of product.
10.	Added_date	date	-	Not null	It holds the stock in date of product.
11.	Subcategory_id	Int	10	Foreign key	It holds the unique subCategory_ID from subcategory table.
12.	Size_id	Int	10	Foreign key	It holds the unique size_ID from size table.
13.	Color_id	Int	10	Foreign key	It holds the unique Color_ID from color table.

### 3.tblcategory :-

Sr.no	Attribute Name	Data Type	Size	Constraint	Description
1.	ID	Int	10	Primary Key	It holds unique Category ID.
2.	Category Name	Varchar	50	Not null	It holds the name of Category of product.

#### 4.tblsubcategory :-

Sr.no	Attribute Name	Data Type	Size	Constraint	Description
1.	ID	Int	10	Primary Key	It holds unique ID
2.	Sub Category Name	char	50	Not Null	It holds the name of SubCategory of product.
3.	Category_Id	Int	90	Foreign key	It referred the Id of Category from Category table

#### 5.tblbrand :-

Sr.no	Attribute Name	Data Type	Size	Constraint	Description
1.	ID	Int	10	Primary Key	It holds unique Brand ID.
2.	Brand Name	Varchar	50	Not null	It holds the name of Brand of product.
3.	subcategory_Id	Int	90	Foreign key	It referred the Id of subCategory from subCategory table

#### 6.tblsize :-

Sr.no	Attribute Name	Data Type	Size	Constraint	Description
1.	ID	Int	10	Primary Key	It holds unique size ID.
2.	Size Number	Int	50	Not null	It holds the name of size of product.

### 7.tblcolor :-

Sr.no	Attribute Name	Data Type	Size	Constraint	Description
1.	ID	Int	10	Primary Key	It holds unique color ID.
2.	Color_Name	Varchar	50	Not null	It holds the name of color of product.

### 9.tbl\_cart :-

Sr.no	Attribute Name	Data Type	Size	Constraint	Description
1.	ID	Int	10	Primary Key	It holds unique ID
2.	Product_ID	Int	10	Foreign Key	It holds the Product_ID from the Product table.
3.	User_ID	Int	10	Foreign Key	It holds the User_ID from the tbl_user table.
4.	Quantity	Int	90	Not null	It holds the quantity of product in cart.
5.	Size_id	Int	10	Not null	It holds the key of Size of tbl_size

### 10.tbl\_order :-

Sr.no	Attribute Name	Data Type	Size	Constraint	Description
1.	ID	Int	10	Primary Key	It holds unique order ID.
2.	FName	Varchar	40	Not null	It holds First Name

3.	LName	Varchar	40	Not null	It holds Last Name
4.	Pay_ID	Int	10	Foreign Key	It holds the pay_ID Which unique
5.	Cart_Product_ID	Int	10	Foreign Key	It holds Cart_product_id from Cart product table.
6.	Order_Date	date	-	Not null	It holds the orders date.
7.	amount	Float	10,2	Not null	It holds total amount of the product.
8.	Order_Status	Varchar	20	Not null	It holds the status of availability Payment the product.

## 12.tblfeedback :-

Sr.no	Attribute Name	Data Type	Size	Constraint	Description
1.	ID	Int	10	Primary Key	It holds unique review ID.
2.	user_ID	Int	10	Foreign Key	It holds the user_ID from the user table.
3.	Description	Varchar	500	Not null	It holds the Review description.

## 13.tblstate :-

Sr.no	Attribute Name	Data Type	Size	Constraint	Description
1.	ID	Int	10	Primary Key	It holds unique state ID.

2.	name	varchar	200	Notnull	It holds name of state
----	------	---------	-----	---------	------------------------

#### 14.tblcity :-

Sr.no	Attribute Name	Data Type	Size	Constraint	Description
1.	ID	Int	10	Primary Key	It holds unique state ID.
2.	name	varchar	200	Notnull	It holds name of state
3.	State_id	Int	10	Foreign key	It referred sstate_id from state table

#### 15.tblstock :-

Sr.no	Attribute Name	Data Type	Size	Constraint	Description
1.	ID	Int	10	Primary Key	It holds unique stock ID.
2.	Product_ID	Int	10	Foreign Key	It refrereds the Product_ID from the Product table.
3.	Quantity	Int	20	Not null	It holds the Quantity of the product.

## **8.Future Enhancement :**

The Performance and efficiency of the system can be enhanced by techniques advances.

## **Conclusion:**

This software has its own advantages and disadvantages but it can surely help with the easier and error-free management of a System. It is much efficient and useful then the current manual system.

## **Bibliography :**

1) Book Referred :- Object Oriented software engineering by Yogesh Singh and Ruchika Malhotra.
